

FROGGER

PREMIER SPECIAL EFFECTS UNITS

PHAT FROGGER

Featured in the new Mercedes Benz Stadium in Atlanta, the Phat Frogger is the largest CO2 effect available in the USA and on the market today.

- 40ft. (12m) + plumes of smoke (approximately 4x the size of the Classic Frogger)
- A custom manifold allows for fixed barrel positions
- An increased output allows the effect to hang momentarily in controlled environments
- Rugged construction and coating provides longevity
- Uniform color and texture on the unit blends in to any environment
- The Phat Frogger requires a large amount of CO2 to create this effect- CO2 levels should be monitored for the safety of your crew and audience

Classic FROGGER

Our unique design and engineering provides reliable performance trusted by NFL teams, Major League sports, concert production and more since 2010.

- 30ft. (9m) + plumes of smoke
- Available in single or double barrel configurations
- Can be affixed to it's baseplate or to a truss clamp
- Barrel has 360° of movement
- Rugged construction and coating provides longevity
- Uniform color and texture blends in to any environment
